Introduction

PBImgAnalysis is a C library providing structures and functions to perform various data analysis on images.

It implements the following algorithms:

• K-means clustering on the RGBA space of pixels in a user defined radius

It uses the PBErr, PBDataAnalaysis, GenBrush libraries.

1 Interface

```
// ====== PBIMGANALYSIS.H ========
#ifndef PBIMGANALYSIS_H
#define PBIMGANALYSIS_H
// ========= Include =========
#include <stdlib.h>
#include <stdio.h>
#include <stdbool.h>
#include <execinfo.h>
#include <errno.h>
#include <string.h>
#include "pberr.h"
#include "pbdataanalysis.h"
#include "genbrush.h"
// ====== Define =======
// ========= Data structure ==========
typedef struct ImgKMeansClusters {
  // Image on which the clustering is applied
  // Uses the GBSurfaceFinalPixels
  const GenBrush* _img;
  // Clusters result of the search
  KMeansClusters _kmeansClusters;
  // Size of the considered cell in the image around a given position
  // is equal to (_size * 2 + 1)
  int _size;
} ImgKMeansClusters;
// ====== Functions declaration =========
// Create a new ImgKMeansClusters for the image 'img' and with seed 'seed'
// and type 'type' and a cell size equal to 2*'size'+1
